GROWTH WAVE

WE STRIVE FOR SUSTAINABLE GROWTH

Capability Development | Digital Learning | People Consulting

Growth Wave

Building capability that strengthens performance.

WE STRIVE FOR SUSTAINABLE GROWTH

Company Profile | 2026

Riyadh, Kingdom of Saudi Arabia

GROWTH WAVE AT A GLANCE

Growth Wave helps organizations identify, build, and enable the capabilities their people need to perform — through consulting, training, and digital learning.

Growth Wave is a Saudi-based capability development company supporting organizations in strengthening workforce capability, improving workplace performance, and translating development priorities into practical solutions.

Headquartered in the Kingdom of Saudi Arabia, we combine local market understanding with professional methodologies, specialist expertise, and flexible delivery models to support organizations across different sectors and operating environments.

Our role extends beyond individual training delivery. We work across the capability-development lifecycle — from understanding organizational requirements and identifying capability priorities to designing solutions, developing learning content, delivering interventions, supporting workplace application, and evaluating outcomes.

RIYADH, KINGDOM OF SAUDI ARABIA

OUR THREE SOLUTIONS LINES

01
Capability Development

Customized instructor-led, virtual, and blended development solutions designed around organizational priorities and workplace requirements.

02
Digital Learning

Structured and engaging digital learning experiences designed to improve scale, accessibility, consistency, and learner experience.

03
People Consulting

Advisory support that helps organizations identify capability requirements, strengthen development structures, and align people-development initiatives with organizational priorities.

Vision, Values and Institutional Standards

OUR VISION

To enable stronger organizational performance through relevant, practical, and professionally delivered capability solutions.

OUR VALUES

Excellence

Professional discipline and quality across design and delivery.

Partnership

Close collaboration with clients and stakeholders.

Innovation

Modern approaches and enabling technologies where they add value.

Impact

Focus on application, improvement, and meaningful outcomes.

Perspective

CEO PERSPECTIVE

"We believe capability development creates the greatest value when it is connected to real organizational priorities and translated into workplace performance."

Abdullah Alfakih
Co-Founder & CEO

STRATEGIC PARTNER PERSPECTIVE

"Sustainable capability comes from aligning development with strategy, applying it in practice and reinforcing it through daily work.."

Alaa A. Hammodah
Strategic Partner

THE BUSINESS CHALLENGES WE HELP ADDRESS

Capability Development Should Solve Business Problems

Organizations invest significantly in developing their people. The challenge is ensuring that development activity is connected to genuine capability requirements, workplace priorities, and organizational performance.

GROWTH WAVE SUPPORTS ORGANIZATIONS IN ADDRESSING

Capability Gaps

Identifying and addressing the knowledge, skills, behaviors, and professional capabilities employees require to perform effectively.

Leadership & Management Development

Strengthening leadership and management capability across different organizational levels and responsibilities.

Learning Relevance

Moving beyond generic training toward development experiences that reflect the organization's context, audience, challenges, and workplace realities.

Workforce Performance

Connecting development interventions to practical application, stronger behaviors, professional judgment, and workplace effectiveness.

Digital Learning at Scale

Transforming learning content into structured digital experiences that improve accessibility, consistency, engagement, and scalability.

Learning & Capability Strategy

Helping organizations establish clearer development priorities, learning structures, capability frameworks, and development pathways.

Regulatory & Specialist Capability

Supporting organizations operating in regulated or specialized environments where capability development must reflect professional standards, regulatory expectations, and operational realities.

OUR PRINCIPLE

Development should not exist as an isolated activity. It should support the capabilities people need to perform, the priorities organizations need to execute, and the outcomes stakeholders expect to see.

OUR INTEGRATED SOLUTION ARCHITECTURE

One Capability Partner. Three Integrated Solutions Lines.

Organizations do not always need a training course. They may need to diagnose a capability challenge, define required competencies, establish a development roadmap, develop customized content, build an eLearning solution, deliver instructor-led development, or combine several interventions within a broader capability journey. Growth Wave brings together three complementary service lines so that the solution is structured around the requirement rather than around a predetermined format.

01

Capability Development

Instructor-led, virtual, and blended development solutions that build relevant workplace capability.

02

Digital Learning

Digital learning experiences that enable organizations to deliver structured, engaging, and consistent learning at scale.

03

People Consulting

Advisory support that helps organizations diagnose capability requirements, strengthen development structures, and align workforce-development initiatives with organizational priorities.

INTEGRATED WHEN REQUIRED

People Consulting identifies and structures the requirement.

Capability Development develops knowledge, capability, judgment, and behavior.

Digital learning reinforces, scales, standardizes, or sustains development.

One Requirement May Need More Than One Intervention.

The three service lines can operate independently or as part of a broader solution. Growth Wave brings the relevant components together around the client's need.

01

Capability Development

SOLUTIONS LINE 01

Capability Development Designed Around Workplace Requirements

Growth Wave designs and delivers customized capability-development solutions for leaders, managers, professionals, specialists, and broader employee populations.

Our approach starts with the target audience, organizational requirement, and expected workplace application — rather than selecting generic content and adapting it afterward.

Growth Wave helps organizations identify, build, and enable the capabilities their people need to perform — through consulting, training, and digital learning.

CAPABILITY DEVELOPMENT

Our Training Solutions

Leadership Development

Programs and development journeys that strengthen leadership capability across different organizational levels.

Management Development

Practical capability development across team leadership, communication, collaboration, performance management, decision-making, and workplace effectiveness.

Professional Capability Development

Programs addressing the professional and behavioral capabilities employees require to perform effectively.

Functional & Specialist Development

Learning interventions structured around specific functional, professional, or technical capability requirements.

Compliance & Regulatory Learning

Structured programs supporting regulatory awareness, professional responsibility, and role-relevant compliance capability.

Customer Experience & Service Excellence

Development focused on customer-facing capability, service behaviors, communication, and experience improvement.

Finance & Business Acumen

Programs supporting financial understanding, commercial awareness, and stronger business decision-making.

Customized Development Journeys

Multiple development interventions structured as an integrated pathway rather than a series of isolated courses.

DELIVERY FORMATS

- Classroom training
- Virtual instructor-led learning
- Blended learning
- Digital learning integration
- Workshops
- Multi-stage development journeys

OUR TRAINING PRINCIPLE

The objective is not simply to deliver content. It is to create a relevant development experience participants can understand, apply, and connect directly to their responsibilities.

02

Digital Learning

SOLUTIONS LINE 02

Digital Learning Designed for Scale, Consistency and Engagement

Growth Wave develops digital learning experiences that help organizations make learning more accessible, structured, consistent, engaging, and scalable.

We transform complex or detailed subject matter into learner-focused digital experiences built around clear learning objectives, logical content architecture, practical relevance, and usability.

Growth Wave helps organizations identify, build, and enable the capabilities their people need to perform — through consulting, training, and digital learning.

DIGITAL LEARNING

Our Digital Learning Solutions

Custom eLearning Modules

Bespoke digital learning developed around organizational content and defined learning requirements.

Compliance & Regulatory eLearning

Digital experiences designed to deliver important regulatory, compliance, risk, policy, or professional content consistently across employee populations.

Interactive Learning Experiences

Learning incorporating scenarios, decision points, activities, knowledge checks, practical examples, and other learner interactions.

Blended Learning Components

Digital learning used before, during, or after instructor-led development to prepare, reinforce, or extend learning.

Content Transformation

Transforming technical, professional, regulatory, policy, or existing learning content into structured digital learning experiences.

Learning Reinforcement

Digital interventions designed to support continued learning and application following formal development.

OUR DIGITAL LEARNING PRINCIPLE

Technology alone does not create effective learning.

EFFECTIVE DIGITAL LEARNING BRINGS TOGETHER:

Content Architecture + Instructional Design + Learner Experience + Interaction + Relevance + Accessibility

03

People Consulting

SOLUTIONS LINE 03

Strengthening the Systems Behind Capability Development

Some organizational challenges cannot be solved through training alone.

Growth Wave provides practical HR and capability consulting support to help organizations strengthen the frameworks, strategies, structures, and development mechanisms that influence workforce capability and performance.

Growth Wave helps organizations identify, build, and enable the capabilities their people need to perform — through consulting, training, and digital learning.

PEOPLE CONSULTING

Consulting Areas

Capability & Competency Frameworks

Supporting organizations in defining the capabilities required across functions, roles, levels, or workforce segments.

Learning & Development Strategy

Helping organizations establish clearer development priorities, methodologies, governance, structures, and capability-development approaches.

Training & Capability Needs Analysis

Identifying capability requirements, target populations, performance priorities, and appropriate development interventions.

Learning Architecture & Development Pathways

Structuring learning journeys and development solutions across different employee populations, organizational levels, or capability requirements.

Performance Support

Designing interventions, resources, and tools that help employees apply required knowledge and capability in the workplace.

Organizational Development Support

Supporting HR-related improvement initiatives connected to capability, organizational effectiveness, development, and alignment.

Capability Improvement Initiatives

Developing structured interventions around defined organizational or workforce requirements.

OUR CONSULTING PRINCIPLE

Diagnosis Comes Before Intervention.

We seek to understand the requirement before recommending the solution. This helps move capability investment away from activity-driven development and toward interventions that address identifiable organizational needs.

OUR CAPABILITY AREAS

Expertise Applied Around Organizational Needs

Growth Wave supports organizations across a range of leadership, professional, functional, and organizational capability areas. The right expertise is selected according to the audience, sector, business requirement, and expected outcome.

Leadership & Management

- Leadership Development
- Management Capability
- Team Effectiveness
- Collaboration & Alignment
- Decision-Making
- Performance Leadership

Human Resources & Talent

- Business Acumen
- Commercial Understanding
- Workplace Effectiveness

Digital & Learning Enablement

- Digital Learning
- eLearning
- Instructional Design
- Blended Learning
- Capability Enablement
- Learning Reinforcement

HOW WE WORK

A Structured Approach from Requirement to Application

Growth Wave follows a structured approach designed to ensure that learning and consulting interventions remain relevant to the client, appropriate for the audience, and connected to workplace application.

01	02	03	04	05	06	07
Diagnose	**Align**	**Design**	**Develop**	**Deliver**	**Apply**	**Measure & Improve**
Understand the business requirement, target audience, workplace environment, capability priorities, and underlying performance challenge.	Engage relevant stakeholders to establish objectives, scope, expected outcomes, constraints, responsibilities, and success criteria.	Structure the solution around the identified requirement, target audience, learning methodology, delivery environment, and intended application.	Create or customize the required content, materials, tools, activities, scenarios, digital components, assessments, or consulting outputs.	Implement through the most appropriate format — classroom, virtual, digital, consulting, blended, or a combination of modalities.	Connect learning to workplace situations, decisions, behaviors, responsibilities, and practical actions.	Evaluate effectiveness using relevant feedback, learning evidence, application measures, and agreed indicators, and use the findings to strengthen future interventions.

OUR PRINCIPLE

The Format Follows the Requirement — Not the Other Way Around.

MEASUREMENT & IMPACT

Moving Beyond Attendance and Completion

Training activity alone does not demonstrate capability improvement. The appropriate level of evaluation depends on the nature, duration, scale, audience, and strategic importance of each engagement. Where relevant, Growth Wave can structure measurement across four levels.

LEVEL 01

Experience & Relevance

Was the intervention relevant, engaging, professionally delivered, and appropriate for the target audience?

POSSIBLE INDICATORS INCLUDE:

- Participant feedback
- Relevance ratings
- Facilitation effectiveness
- Content usefulness
- Learning experience feedback

LEVEL 02

Learning

Did participants develop the intended knowledge, understanding, capability, skill, or judgment?

POSSIBLE METHODS INCLUDE:

- Pre- and post-assessments
- Knowledge checks
- Practical exercises
- Case-based assessment
- Scenarios
- Demonstrations

LEVEL 03

Workplace Application

Is the learning being applied in the participant's role?

EVIDENCE MAY INCLUDE:

- Follow-up assessments
- Manager feedback
- Workplace assignments
- Application commitments
- Behavioral indicators
- Reflection and implementation reviews

LEVEL 04

Organizational Outcomes

For selected strategic engagements, relevant organizational, capability, or performance indicators may be agreed with the client.

Where possible, meaningful measures should be defined before the intervention so that evaluation remains connected to the original requirement.

OUR MEASUREMENT PRINCIPLE

Measure What Is Meaningful for the Engagement.

Not every intervention requires the same evaluation approach, and organizational impact should only be claimed when appropriate evidence exists.

SECTORS WE SUPPORT

Context Matters

Different sectors operate with different priorities, regulatory expectations, stakeholder environments, workforce requirements, and organizational realities. Growth Wave adapts its solutions to the operating context rather than assuming that the same capability-development approach works everywhere.

Banking & Financial Services

PRIORITY

Development solutions for environments where specialist capability, professionalism, regulatory awareness, leadership effectiveness, risk awareness, and customer outcomes are particularly important.

Government & Public Sector

PRIORITY

Capability-development and consulting interventions contextualized for institutional priorities, workforce development, public-sector operating environments, and organizational requirements.

Semi-Government Organizations

PRIORITY

Development solutions supporting organizations balancing national priorities, institutional mandates, commercial execution, and organizational transformation.

Telecommunications

Capability support for organizations operating in fast-moving, technology-enabled, customer-focused environments.

Aviation

Capability development supporting leadership, frontline service, professional effectiveness, customer experience, and inclusive service environments.

Insurance

Professional and regulatory development supporting sector-specific capability requirements.

Healthcare

Capability development supporting leadership, service quality, professional effectiveness, communication, and workplace performance.

Education

Learning and development solutions supporting organizations across the education and learning ecosystem.

Private-Sector Corporates

Customized interventions supporting leadership, workforce capability, customer experience, professional development, and organizational effectiveness.

DELIVERY CAPABILITY

Structured to Support Different Engagement Requirements

Effective delivery requires more than subject-matter knowledge. It requires the right combination of solution design, specialist expertise, project coordination, quality control, stakeholder engagement, and delivery methodology.

OUR DELIVERY MODEL

01 **Requirement Definition**	Clarifying objectives, scope, audience, timing, stakeholders, deliverables, and expected outcomes.
02 **Expert Selection**	Matching the appropriate consultant, facilitator, subject-matter expert, instructional designer, or specialist to the assignment.
03 **Solution Design**	Customizing content, learning methodology, materials, activities, assessment, and overall participant experience.
04 **Project Coordination**	Managing activities, dependencies, stakeholders, deliverables, communication, and delivery requirements.
05 **Quality Assurance**	Reviewing content, learning materials, delivery readiness, and project outputs against agreed expectations.
06 **Delivery**	Implementing through classroom, virtual, digital, blended, or consulting formats.
07 **Evaluation & Follow-Through**	Capturing feedback, reviewing results, documenting outcomes, and identifying relevant follow-up actions.

FLEXIBLE BY DESIGN

Each engagement can be structured according to:

- Audience level
- Organizational context
- Capability requirement
- Regulatory environment
- Delivery format
- Project scope
- Subject complexity
- Stakeholder expectations

OUR PEOPLE & STRATEGIC EXPERTISE

The Right Expertise. The Right Impact

Growth Wave brings together consultants, facilitators, subject-matter experts, instructional designers, digital learning specialists, and delivery professionals with relevant technical and practical experience. Our model enables us to match the expertise required by each assignment rather than relying on one fixed delivery profile.

01 **Subject-Matter Relevance**

The expert should understand the professional or technical discipline being addressed.

02 **Audience Fit**

Senior executives, managers, professionals, specialists, and broader employee populations require different facilitation and communication approaches.

03 **Sector Context**

Industry familiarity can materially improve relevance, particularly in regulated and specialized environments.

04 **Delivery Capability**

Technical knowledge must be combined with the ability to facilitate, communicate, engage, challenge thinking, and translate expertise into practical learning.

05 **Engagement Requirements**

Different projects may require consultants, facilitators, instructional designers, digital specialists, project professionals, or multidisciplinary teams.

SELECTED ENGAGEMENTS

Evidence of Capability Across Different Requirements

The following selected engagements illustrate how Growth Wave has supported organizations through classroom development, specialist capability programs, leadership interventions, regulatory learning, and interactive eLearning.

STC Bank

Banking

WHAT WE DELIVERED

A multi-topic classroom learning programme covering areas including leadership, presentation skills, problem solving, and Power BI.

WHAT IT DEMONSTRATES

The ability to support multi-track classroom capability development within the Saudi banking environment.

Confidential Government Entity

Government

WHAT WE DELIVERED

Content creation and instructional design transformed into interactive eLearning covering business continuity, risk management, and other specialist subjects.

WHAT IT DEMONSTRATES

The ability to convert regulatory and technical subject matter into structured interactive digital learning.

Wataniya Insurance

Insurance

WHAT WE DELIVERED

Board-level training focused on Insurance Authority regulations.

WHAT IT DEMONSTRATES

The ability to contextualize regulatory learning for board-level responsibilities and senior decision-makers.

Bank Albilad

Banking

WHAT WE DELIVERED

An end-to-end AI capability programme covering prompt engineering and workflow automation — created, designed, and delivered specifically for the client.

WHAT IT DEMONSTRATES

The ability to develop customized emerging-technology capability rather than relying on generic off-the-shelf course content.

SELECTED ENGAGEMENTS

Evidence of Capability Across Different Requirements

Flynas

Aviation

WHAT WE DELIVERED

Leadership development programs alongside frontline capability development focused on serving people with disabilities and Saudi sign language.

WHAT IT DEMONSTRATES

The ability to support both leadership development and specialized frontline inclusive-service capability within one client environment.

Confidential Government Entity

Government

WHAT WE DELIVERED

Professional training programs in Finance.

WHAT IT DEMONSTRATES

The capability to develop and deliver technical finance learning within a national academy environment.

Saudi Awwal Bank (SAB)

Banking

WHAT WE DELIVERED

Content creation and instructional design transformed into interactive eLearning covering compliance, fraud,, and other subjects.

WHAT IT DEMONSTRATES

The ability to convert complex regulatory and risk-related subject matter into structured interactive learning experiences.

LET'S BUILD THE RIGHT SOLUTION

Start with the Requirement

Every organization has different priorities.

- Some need to develop stronger leaders.
- Some need to strengthen specialist or professional capability.
- Some need to build structured development journeys.
- Some need to transform traditional content into scalable digital learning.
- Some need to establish stronger capability frameworks or development strategies.
- Others need advisory support before determining the right intervention.

Growth Wave works with clients to understand the requirement first and structure the appropriate combination of consulting, capability development, and digital learning around it.

WHAT CLIENTS CAN EXPECT

Relevant to the organization.
Solutions designed around the client's context and priorities.

Appropriate for the audience.
Content, methodology, and delivery aligned to participant requirements.

Practical in application.
Development connected to workplace realities rather than theory alone.

Professionally delivered.
Structured design, specialist expertise, project coordination, and quality assurance.

Measured at the level that matters.
Evaluation aligned to the objectives and significance of the engagement.
